

Dear families & caregivers,

We're so excited your school has chosen our program this year. Amplify Desmos Math is a core math curriculum built with student-centered instruction in mind. Student-centered instruction gives students opportunities to *figure out* how math works. They learn to communicate verbally and in writing, understand and challenge others' opinions, and build confidence in solving new problems.

Each lesson offers opportunities to build on students' understanding; connect their ideas; develop their skill fluency; and empower them to ask questions, explore, and make discoveries.

Here's what you can expect:

- Interactive lessons that blend paper-based and digital learning.
- Practice problems to support fluency and review previous topics.
- Resources within each lesson to meet the needs of diverse learners.
- A variety of assessments to help teachers monitor your child's progress.
- A caregiver resource for each unit that includes explanations of key math concepts and problems to try with your student.

Your hard work plays an essential role in your students' math experience. We hope your students enjoy using technology to explore math, working with friends to solve problems, and learning all sorts of new and interesting concepts.
